

OHIO TURNPIKE COMMISSION

OUTFALL PERMIT APPLICATION

GENERAL CONDITIONS

The following General Conditions are to be reviewed, appropriate information collected and the Permit Application form filled out by the applicant and/or property owner. Prior to submitting the Outfall Permit Application package, the applicant and/or property owner must provide appropriate signatures acknowledging that they have read these General Conditions and are aware of the requirements stated herein.

The Ohio Turnpike Commission (OTC) requests that six (6) copies of the completed Outfall Permit Application package be submitted to the Ohio Turnpike Commission, Attention: Chief Engineer, 682 Prospect Street, Berea, Ohio 44017.

1. The Outfall Permit Application package must include correspondence with the following general information:
 - a) Scope of proposed work and a detailed description of the project.
 - b) Proposed schedule and tentative dates for performing each phase of work.
2. The Outfall Permit Application package must include engineering drawings, specifications, permits and design calculations and shall contain sufficient information to sufficiently describe the proposed outfall, with the following information as described below;
 - a) Engineering Drawings – The drawings shall show the location of the proposed outfall with respect to the Turnpike centerline stationing and plan and profile of the pipe, with respect to Turnpike lines and grades;
 - b) Specifications –The following items are to be provided:
 - i. Pipe material, specifications and grade
 - ii. Diameter
 - iii. Type of joint
 - iv. Equipment
 - v. Structures (i.e. concrete headwall, manhole, catch basin, etc.)
 - vi. Other construction materials pertinent to the outfall
 - c) Other Permits – Provide copies of permits from all applicable regulatory agencies, such as the Ohio Environmental Protection Agency (OEPA) and the appropriate county health department.
 - d) Design Calculations: Provide hydraulic calculations of existing and proposed flows discharged, prepared and certified by a State of Ohio Professional Engineer.

3. Instructions for Completing the Outfall Permit Application form with the following information:

- a) Name of property owner (include a contact name and phone number) and applicant if different than the property owner.
- b) Purpose/Contents of the proposed outfall (i.e. storm water discharge, field tile drainage, etc.).
- c) Address of the property where the proposed outfall is to be located, if different than the property owner, name of county and Ohio Turnpike milepost if available.
- d) The estimated current contributed flow, if applicable (Gallons per Day, GPD)
- e) The design proposed maximum flow (Gallons per Day, GPD).
- f) Approximate installation dates.
- g) Signature of the property owner or a designated representative accepting responsibility for insuring the compliance with all governing regulatory agencies, the installation of the outfall per the approved plan in addition to the requirements stated herein.

4. General Considerations:

- a) Outfall designs shall be in accordance with the current version of ODOT's "Location and Design Manual, Volume II, Drainage Design" manual.
- b) Positive drainage shall be maintained.
- c) Outfalls shall comply with the applicable regulatory agency design standards, guidelines and/or restrictions.
- d) The permit holder shall provide notification to the Commission of any identified illicit discharge to the drainage systems which discharge to the OTC Right-of-Way.

5. OEPA discharge content restrictions include, but are not limited too, the following:

- a) This permit does not authorize:
 - i. Discharges that are mixed with sources of non-storm water unless such non-storm water discharges are:
 - In compliance with a separate National Pollutant Discharge Elimination System (NPDES) permit, or
 - Determined by Ohio EPA not to be a substantial contributor of pollutants to surface waters of the State.
 - ii. Storm water discharges associated with industrial activity as defined in 40

CFR § 122.26 (b)(14)(i)-(ix) and (xi) that are not in compliance with a separate in force NPDES permit.

- iii. Storm water discharges associated with construction activity as defined in 40 CFR §122.26(b)(14)(x) or 40 CFR § 122.26(b)(15) that are not in compliance with a separate in force NPDES permit.
- iv. Storm water discharges currently covered under another permit.
- v. Discharges that would cause or contribute to in-stream exceedances of water quality standards. OEPA may require additional actions or an application for an individual permit or alternative general permit if an MS4 is determined to cause an in-stream exceedance of water quality standards.
- vi. Discharges of any pollutant into any water for which a Total Maximum Daily Load (TMDL) has been approved by U.S. EPA (this information can be obtained from OEPA) unless your discharge is consistent with that TMDL. This eligibility condition applies at the time you submit an NOI for coverage. If conditions change after you have permit coverage, you may remain covered by the permit provided you comply with the applicable requirements of the TMDL. For discharges that cannot comply with TMDL requirements under this permit, you will be instructed by Ohio EPA to apply for an individual or other applicable general NPDES permit.
- vii. Discharges that do not comply with Ohio EPA's anti-degradation policy for water quality standards.

6. Permit Compliance and Revocation

- a) Compliance with all other applicable regulatory agencies such as the OEPA and the local county health department must be maintained to avoid the revocation of an OTC issued outfall permit. The OTC approved outfall permit will become void if:
 - i. Any approved permit(s) from another agency is revoked, expires or in any way becomes void;
 - ii. It is discovered that the outfall is releasing discharges that are not compliant with the OEPA National Pollutant Discharge Elimination System (NPDES) General Permit for discharging to surface waters of the state or an individual OEPA NPDES permit;
 - iii. The purpose of the outfall has been altered to anything other than what was originally authorized without prior approval from the OTC;
 - iv. Any other non-compliance issues develop as a result of the discharge, construction or physical nature of the constructed outfall.
- b) Discovery of any non-compliance resulting from discharges released by the outfall shall result in notification to the owner.

- i. The OTC reserves the right to notify regulatory agencies of non-compliance.
- ii. The property owner will pay for any sampling and/or testing resulting in the confirmation of non-compliance.
- c) Non-compliance must be resolved within twenty-one (21) days of receiving notification from the OTC.

The OTC reserves the right to resolve non-compliance issues from within the Commission Right-Of-Way at the expense of the property owner.

7. Miscellaneous

Work within the OTC Right-Of-Way is to be completed by the OTC at the property owner's expense.
