Q#2 Part IX.5 of the RFP describes requirements for subconsultants. Our understanding is that respondents (Prime Consultants) are to perform the core services required by the Master Trust Agreement, sub-consultants shall not perform core services. Underwater bridge inspection is necessary for the some of the in-depth inspections included in the contract. Underwater Inspections are a specialty service that is not typically performed by larger national consulting firms. Is it acceptable to sub-contract underwater bridge inspections for this contract?

A#2 Yes.
