ANSWERS TO QUESTIONS RECEIVED THROUGH 1:00 P.M. ON DECEMBER 10, 2025:

- Q#1** I'm writing in concern of the shortened parts list on the Bid Invitation 4493 for the Cat and Matt system items.
On the Cat 350 system for example you have Wood Post but no Wood Blocks which are special to this system another example is the 4'6" tube sleeve #740G but No Soil plates #766G to attach to the sleeve before the tube sleeve is inserted into the ground . You have depleted all the hardware which is so important to each system, I understand you have the Hardware Can still in place but is rarely needed unless a complete repair is called for. Here is an example for the hardware, If you would need the #3275G 3/8" x 24-1/2" Restraint Rod it's currently on contract for 9.00 ea. but with this coming year's invitation it is not and like many other parts removed which are special to this system, the only way to purchase that item would be through the Hardware Can for 1,490.00 which then leaves parts not needed. Without going through the Matt system in detail I see hardware parts have been deleted as well, again a lot of these nuts and bolts may seem common but are parts specific to these systems. Please find in the attachment the two systems their part numbers and the amount of parts needed for each item. Please look back at last year's bid list on both systems and review.
- A#1 The Bid Schedule included in this Bid Invitation was shortened this year. The intent is to still order these parts through this blanket purchase order, but by utilizing the Current Parts Price List and percentage rate discount bid on the right hand side of each Bid Schedule. Each Bidder is required to provide a parts price list for each system with a specified percentage discount which would apply to the parts not listed in the Bid Schedule.*

END OF ADDENDUM NO. 1
